# Why Insight for AWS

Expert support for AWS cloud, from assessment and migration to optimization and expansion

Insight is a leading AWS partner, helping organizations leverage scalable and cost-effective cloud resources for greater organizational agility. As an AWS Marketplace Skilled Consulting Partner (MSCP), we offer a host of Independent Software Vendor (ISV) solutions to help our clients make the most of their AWS® cloud environments, from migration to optimization.

Key service areas

Cost optimization	Cloud security	Migration	Cloud Economics Assessments	Infrastructure Assessments	Storage and backup

Insight by the numbers

Overview and scale

4,500+	1,500+	25+ years	400+
engineers, architects & tech field consultants	projects delivered per year	of data center experience	enterprise data centers migrated/consolidated since 2015

Why Insight for modernization

Regularly running **300+** public cloud projects at any given time

>1EB of data and **>2M** workloads migrated since 2015

Consulted on **4,000+** projects in 2021

Managed Services clients on **6** continents

300+ individual service offerings

Client success story

A large federal contractor establishes a comprehensive chargeback model.

Challenge: With hundreds of AWS accounts, the company was looking to assign costs for shared services such as user authentication and monitoring.

Solution:

- Build out detailed inventory reports of compute and storage.
- Segment data based on line-of-business and individual project.
- Make reports accessible, processable and savable long term in case of audits.

Insight is a top AWS partner

- AWS DevOps

Cloud Optimization Services

Insight's Cloud Optimization Services for AWS offer a single-pane-of-glass platform — the CloudCheckr management portal — to secure, manage and govern your AWS environment. They also include regular cadence calls with Insight cloud experts to deliver personalized guidance to help you reduce total cost of ownership, improve cloud security and increase your overall confidence in AWS management.

Get control over cloud costs to capitalize on total business value.

Take the guesswork out of securing your AWS cloud environment.

Simplify cloud management to relieve IT teams of excessive manual tasks.

Scale or make changes to your cloud environment with ease.

CloudCheckr management portal

Insight's CloudCheckr management portal offers users a platform to secure, manage and govern your AWS environment.

- Unified visibility
- Flexible, dynamic reporting
- Automated cost optimization reports
- Recommendations on Reserved Instance (RI) purchases and cost savings plans
- Flexible budget and utilization alerting
- Best practices recommendations
- Log changing across one or multiple accounts
- Identification of AWS Security Hub vulnerabilities
- Compliance reports
- Governance and security policy framework guidance
- Ready access to historical data

Regular cadence calls

Cadence calls with Insight's AWS architects and cloud success advisors deliver personalized consulting for your AWS environment. Get guidance on AWS services options and best practices, identify opportunities for configuration or automation, and receive support for scaling on the fly or retiring unused services.

AWS Consulting Services at Insight

As an AWS Advanced Tier Services Partner, Insight brings the expertise of more than 4,500 engineers, architects and tech field consultants to help our clients deploy AWS to optimize cloud initiatives and realize transformation goals.
