Why MPS with Insight

Partnering with Insight to deliver HP Managed Print Services, you can improve awareness of your printing environment, optimize your printing costs, and outsource the everyday management of your printer fleet to make printing an effortless and efficient part of your business.

Why HP MPS?

- Industry-leading MPS deployed with velocity
- Reduce/control/report print-related costs
- HP Managed devices optimized for MPS

- World-class service delivery
- World's most secure printers
- Best-in-class software solutions

- Thoughtful management of change
- Tools provide real-time visibility of fleet
- Enhanced printing and workflow efficiency

Automation - Genuine toner will be shipped directly to the destination you designate for each print device automatically before you run out. Free up your office and closet space from stacks of old unwanted toner.
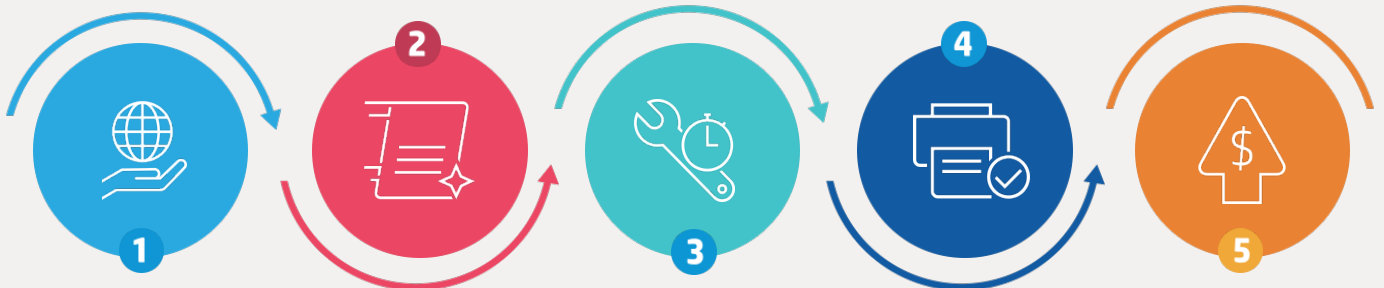

Service – Our standard service level of next day onsite repair includes an HP service tech and supplies only genuine OEM parts. Our customers benefit from a first time fix-rate above 95% which reduces downtime and improves business processes. Access to an easy use dashboard to open tickets and view supplies delivery tracking.

Billing – Insight offers monthly billing options, with no minimum fees or penalties for overages. As an MPS client with Insight you benefit from transparent itemized billing. Paying for only the pages you print provides a clear picture of what the true costs of printing are within your environment.

Management – A project manager will be assigned to ensure onboarding and ongoing management is handled in a timely manner.

Five steps to worry free printing

1 Engagement
- Evaluate printing environment
- Gather page counts and supply costs
- Design a proposal to optimize ROI

2 Onboarding
- Inventory your printer fleet
- Assign unique IDs to every device
- Entitle devices for service and supplies delivery

3 Support
- Provide printer supplies as needed
- Respond quickly and complete service on the first visit
- Provide visibility an access via online tools

4 Assessment
- Conduct regular print perfomance reviews
- Identify required security protocols
- Recommend solutions to improve workflow

5 Optimization
- Optimize the print fleet
- Implement necessary security measures
- Streamline workflow
