

Solution Brief

# A New Approach for Reducing Risk and Driving Transformation

Insight's As a Service offering gives you flexible consumption models and the latest technologies.

The pressures on organizations to reduce risk have never been greater. Organizations cannot afford to put transformation and innovation on the back burner. In-progress cloud or other modernization initiatives retain significance, as a way to achieve specific organization objectives and position a company as a true competitor.

Many are looking at cloud to reduce capital spending and provide agility. But achieving these outcomes can be difficult. In addition, organizations are being asked to transform during times of uncertainty, driving the need for new IT models and approaches.

As a Service offerings enable your organization to reduce risk and capital expenditures by paying only for what you need on-premises, when you need it. These offerings provide a public cloud-like model on-premises, with consumption-based pricing, plus the flexibility to shift on-premises workloads to public cloud at key times.

## Service-based pricing

Use the latest storage technologies from NetApp with an OpEx model through Insight, which offers complete pricing transparency and no contract minimums. Pricing is communicated clearly up front with a minimum to start, while providing the flexibility to scale based on need.

## Why Insight Public Sector?

As an organization, Insight Cloud + Data Center Transformation (CDCT) has a legacy in expert-led data center services delivery. We can help assess your needs and As a Service models, recommend a best-fit approach for your organization, and provide care through our skilled and certified service delivery teams to alleviate lock-in and lower the risk your organization faces.

## Key benefits:

 Better manage risk from cloud and business uncertainty

Reduce CapEx spending through OpEx models

Pay only for what is used — no overspending 

 Scale rapidly up/down to accommodate fluctuations 

Simplify capacity planning by removing added cost pressures

 Enhance on-premises performance while supporting hybrid cloud initiatives

KEYSTONE

## Service details

Each of our three service levels gives you the best-in-class vendor solution(s) of your choosing, and strategic and technical support from Insight CDCT to optimize performance and free up your IT team to focus on strategic initiatives. Service levels span from Essentials, to help you get started, to fully managed Advanced and Premier services.

### Essentials services
