Vision AI Accelerator

Business challenge

Driving sustainable business growth requires the visibility to identify challenges across your organization, and the data intelligence to improve operations and customer experiences. Vision AI from Google Cloud offers outstanding new opportunities for companies to capture new data, derive insights, automate processes and empower employees like never before.

How we help

Insight's Vision AI Accelerator offers a set of patterns, practices and tools aligned to accelerate the ideation, development and integration of value-oriented Vision AI into your ecosystem.

This accelerator includes:

- Rapid team onboarding, requirements gathering and identification of visible wins with high Return on Investment (RoI)
- Collaborative AI and UX ideation and design sessions with business stakeholders to drive effective interfaces that enable your workforce and optimize business
- Overall solution design and implementation plan detailing core Customer 360 functionality and integration with client security, compliance, infrastructure and operational endpoints
- Iterative solution build aligned to show progress and value every few weeks

Preparing for transformation

To ensure you receive the greatest value from this engagement, you will need:

- A strong value case for Vision AI and the participation of involved business stakeholders

Duration
Varies based on scope

Benefits
- **New efficiencies** gained through workforce empowerment or automation
- **Repeatable patterns and processes** for ideation and development
- **Visibility into customer experience** across your entire business
