

## Why Insight for e-procurement?

At Insight, we've helped hundreds of businesses like yours take advantage of our e-procurement solution by integrating their existing systems via punchout. When you decide to integrate, a dedicated project manager will coordinate your integration. This helps ensure that our solution is tailored to your current and future needs – and is delivered on time. The end result: a dynamic system that provides maximum return on your investment.

- Our project managers are experienced in large and small integration projects.
- We collaborate with your IT department to ensure a smooth, cost-effective transition.
- We recommend best practices to help you maximize efficiencies.
- Our flexible e-procurement solutions work seamlessly with all industry-leading applications.

Insight extends purchasing with automated approval routing to help your business run smarter.

## How e-procurement integration will help your business

An e-procurement solution can deliver significant savings - but only if properly integrated with supplier systems. By integrating your online e-procurement catalog, you'll:

- Gain easy access to product information, availability and custom pricing.
- Extend purchasing to end users while controlling maverick purchases.
- Boost productivity and focus human resources on critical tasks.
- Shorten the purchase lifecycle, increase order accuracy and reduce returns.
- Make reconciliation easier and more efficient.

## Smooth and simple integration

We have experience integrating with leading e-procurement solution providers, and we support industry-standard integration formats/methods.

| E-procurement solution providers supported |                  | Integration formats/methods supported |
|--|------------------|---------------------------------------|
| Ariba XML                                  | PeopleSoft       | EDI                                   |
| Coupa                                      | Perfect Commerce | OCI                                   |
| ePlus                                      | SAP              | xCBL                                  |
| Equal Level                                | SAP EBP/OCI EDI  | XML                                   |
| Exostar                                    | SciQuest         |                                       |
| ExpenseWatch xCBL                          | Tungsten         |                                       |
| GHX  | Tradecraft       |                                       |
| Hubwoo                                     | Taulia           |                                       |
| Oracle Exchange                            | Vinimaya         |                                       |
| Oracle iProcurement                        | Workday          |                                       |
| ServiceNow                                 |                  |                                       |

## Additional options

We leverage technology such as Electronic Data Interchange (EDI), as well as other industry standards like cXML and xCBL, to help you improve ordering and invoicing accuracy, and productivity. Integrating these solutions directly with yours helps eliminate typing, faxing and rekeying important documents, including purchase orders and invoices.

| EDI document support                 |   |
|--------------------------------------|---|
| EDI transactions via AS2, FTP or VAN | 850 — Purchase Orders                   |
| 810 — Invoices                       | 855 — Purchase Order Acknowledgements   |
| 820 — Payment Orders                 | 856 — Advance Ship Notices              |
| 824 — Application Advice             | 857 — Shipment and Billing Notification |
| 830 — Planning Schedule              | 860 — Purchase Order Changes            |
| 832 — Price Catalogs                 | 997 — Functional Acknowledgements       |

## Standards support for integration you can trust

At Insight, we support the standards developed and maintained by the Accredited Standards Committee (ASC) X12. These standards are designed to work across industry and company boundaries.
