

Immersive Technology

Enhance the worker and user experience.

Business challenge

The culture of work is changing. Dispersed teams must work seamlessly across time zones. Workers are asked to apply creative thinking to solve complex problems. The modern workforce is seeking technology-driven solutions to help them work better, faster and smarter.

Immersive technology such as Virtual Reality (VR), Augmented Reality (AR) and Mixed Reality (MR) are emerging as powerful tools that transform how people learn and work. In this blended environment, resources are literally brought to the user's fingertips. Through the use of holograms, people, places and objects are able to interact in fluid, advantageous ways.

Our solution

Insight's immersive technology solutions help you successfully bring the digital and physical world together and deliver meaningful outcomes. Our team of highly skilled architects will walk you through a rapid development process to create a fully functioning Proof of Concept (PoC).

Immersive technology offers a wide range of use cases, such as enhanced training through VR scenarios.

Benefits

- Increased awareness of immersive capabilities for stakeholders
- Defined and refined use cases through interactive workshops
- Fully functional PoC or Minimum Viable Product (MVP)
- Roadmap to expand on PoC/MVP
