

Microsoft 365 Compliance Workshop

Understand and mitigate the
compliance risks of dark data.

Business challenge

Until recently, the focus of managing data was centered around documents and emails. The increasing use of digital/cloud technology and the rapid shift to remote work have greatly expanded the information data landscape. Much of that data becomes stale or unused not long after the initial creation and contains information that could expose a compliance risk.

Protecting information — wherever it goes — is critical to ensuring trust and meeting compliance requirements. But first, you need to know what data you have, where it is, how it's being used and the compliance risks that may exist.

Our solution

Insight's Microsoft 365 Compliance Workshop enables you to understand the data risks that may reside in your environment and how to address them. This one-day workshop will show you how to identify data risks, assess your strategic objectives and priorities for compliance. You'll also gain a greater understanding of Microsoft's approach to ensuring compliance, and develop an action plan with long-term recommendations for mitigating compliance risks.

The workshop also includes a Data Risk Check report that uses automated Microsoft® tools and services to discover data stored in the Microsoft Cloud — and identify potential problem areas.

You'll also learn how to use Microsoft technologies to:

- Identify sensitive information and intellectual property.
- Discover risky or suspicious activities.
- Mitigate and protect against compliance risks.
- Accelerate your compliance journey.

Benefits

- Understand the risks of dark data.
- Assess your data risk profile.
- Learn about Microsoft tools and services for compliance.
- Develop an action plan for next steps.

Our partner

Workshop highlights

Workshop highlights		
		
Evaluate your data risk profile and compliance objectives.	Understand the next steps and remediation plans for protecting compliance-related data.	This single-day workshop will leave you with a concrete plan, timeline and next steps.

What you can expect

When you attend this workshop, you'll leave with a detailed deployment plan, including:

- An environmental and workload analysis, paired with a Data Risk Check
- Ways to mitigate and protect against data risks
- Identification of potential roadblocks and challenges
- Next steps and long-term recommendations for your compliance strategy

A true end-to-end partner

Today, technology isn't just supporting the business; it's becoming the business. At Insight, we help you navigate complex challenges to develop fresh solutions and processes. We'll help you manage today's priorities and prepare for tomorrow's needs.
