

# Secure Remote Workshop

Protect your teams, no matter where they work.

## Business challenge

For 2020, one of the top priorities for small and midmarket businesses is driving investments on mobility solutions.<sup>1</sup> The sudden shift toward remote work has compelled organizations to procure technologies built for the cloud and high-fidelity collaboration to enable employees to do their best work from any location.

However, with hundreds of employees working from home, in the field or branch offices, IT faces a new wave of security challenges and cyberthreats never seen before in traditional environments. The key to proactively safeguarding digital assets, users and data is adopting a productivity cloud solution with enterprise-grade protection.

## Our solution

Microsoft 365™, available from Insight, offers best-in-class Office apps with new levels of device management and access control features to enable the remote workforce. Together, we'll help you introduce these capabilities within your organization through our Microsoft® Secure Remote Workshop.

This one-day workshop is built to deliver a clear understanding of the cloud security solution available from Microsoft 365 by defining your business requirements and aligning the solution to your objectives.

During the workshop, we'll walk you through:

- Discovery and analysis
- Security readiness planning
- A hands-on immersion experience
- Developing an actionable deployment roadmap of Microsoft 365 security features

## Benefits

- Stay up to date with the latest cloud security solution.
- Get expert guidance when deploying Microsoft 365.
- Learn best practices for successful implementation.
- Do more with a hands-on immersive experience.

## Our partner

## Related services

- Azure Active Directory Identity Protection
- Office 365 Advanced Threat Protection
- Microsoft Cloud App Security
- Security & Compliance Assessment
- Productivity Application Services

Enhance your security posture with Microsoft cloud security tool sets and expert guidance from Insight. Our single-day workshop will help you:

- **Develop a deeper understanding** of how your business priorities and initiatives drive security objectives.

- **Identify and analyze security threats** within your environment across email, identity and data through the Microsoft® Threat Check Package.

- **Successfully implement Microsoft 365™ security features** by providing recommendations and best practices.

- **Gain familiarity with Microsoft 365 security solutions** by participating in a customized Security Customer Immersion Experience.

- **Take actionable next steps** that support your security objectives and requirements.

## Why Insight for Microsoft?

For more than 25 years, Insight has been one of Microsoft's leading global partners delivering outstanding expertise in delivering and deploying Microsoft hardware, software and cloud solutions.
