

LEVEL UP ON SECURITY, PERFORMANCE, AND COMPATIBILITY WITH LOGI BOLT

Logitech’s standard mice and keyboard solutions deliver powerful user experiences. Logitech’s new **made for business solutions** deliver technical features and business value **engineered for the Enterprise**. Logi Bolt technology was designed to conquer IT challenges that can emerge whether users occupy the office or work remotely: evolving compatibility requirements, congested wireless environments and increasing security expectations. This next-generation wireless technology delivers value that aligns to the needs of organizations and IT leaders.

Illustrated below are the **New Logi Bolt technical and business advantages** as compared to our standard in market solutions.

	Feature	For Business Logi Bolt	Why it Matters
Technical Value Proposition	Logi Bolt	X	Logi Bolt is based on Bluetooth® Low Energy standard. It is an end-to-end closed system where a Logi Bolt receiver is emitting an encrypted signal that only connects with Logi Bolt products. So the Logi Bolt USB receiver can't be paired with any non-Logi Bolt devices.
	FIPs Compliant Wireless Connection "Secure Connections Only" Mode when Connected via Logi Bolt USB receiver	X	Delivers a Secure Wireless Connection. Bluetooth® Low Energy Security Mode 1, Level 4, also known as Secure Connections Only Mode. Is FIPS compliant!
	Secure Key Negotiation (LESC) When Connected via Logi Bolt USB Receiver	X	Simplifies pairing: Keyboard and Mouse dual authentication during pairing. Mouse hand shake is a next generation dual authentication through guided mouse clicks.
	Logitech's RF Optimization	X	Bust through congestion with a more robust signal: Logitech developed a proprietary algorithm to optimize performance in challenging RF environments.
	Limited DFU rollback	X	Prioritize security Maintain rollback DFU as a feature when not related to security improvements. Anti-rollback DFU for security updates
Business Value Proposition	Warranty	2 Year vs. 1 Year	Extends products lifetime value: Non-Business product includes a 1 year standard warranty. "For Business SKUs come with a 2 year limited hardware warranty (globally)
	Advanced Replacement RMAs	X	Keeps business going: North America offers advanced replacement. Other countries services levels and availability will vary
	Dedicated B2B Lifetime Tech Support	X	Service aligned to business needs: For business solutions are supported by agents who receive special training to service IT professionals and their end users
	Global Availability	X	Simplified global deployment: Globally distributed and certified in 100+ countries
