

Microsoft 365 Security and Compliance Workshop

Modernize security with Insight and Microsoft 365.

Business challenge

Complex security environments leave many organizations unable to identify, assess and mitigate security risks in the overall threat landscape. Microsoft 365™ protects your business data, proactively guards against threats and equips you to better manage identity and access controls. However, understanding how these features impact your organization while keeping up with the pace of changes and updates can be challenging.

Our solution

The road to understanding Microsoft® cloud security and how it can address the specific needs of your organization begins with choosing the right partner.

Insight's Security and Compliance Workshop is the place to begin to understand how Microsoft 365 Security fits into your environment. Our workshop explores the ways Microsoft 365 Security allows you to:

- Empower your remote workforce with a Zero Trust framework.
- Identify, monitor and automatically protect sensitive information.
- Simplify your cloud security with unified, dynamic AI-based solutions.
- Meet compliance requirements for NIST 800, ISO 27001, CMMC and/or HITRUST.

About the workshop

Who should attend:

CISOs, security professionals, cloud architects and engineers who would like to learn more about Microsoft 365 Security and can provide input and feedback about your existing security solutions

Timing:

Delivered over a series of meetings totaling approximately 12 hours between kickoff, discovery and workshop

Deliverables:

- Microsoft 365 Security posture findings
- Next-step recommendations and a long-term roadmap for deploying and managing Microsoft 365 Security in your environment

Benefits

- Understand Microsoft 365 Security capabilities for identity, data, applications and devices.
- Discover how Microsoft 365 can improve your security posture and return on investment while decreasing complexity and modernizing your environment.
