

Next-level meetings, anywhere

Take connectivity to the next level with the best-in-class voice, audio, video and presentation experiences delivered by accessories certified for Microsoft Teams®. These accessories enable seamless collaboration and reliable meeting experiences that help employees stay focused, connected and productive wherever they work.

Better meetings and collaboration

You'll effortlessly advance slides, never be told "you're on mute," and turn any room into a conference room. Every accessory certified by Microsoft® Teams has been tested to rigorous standards to enable flexible, rich and reliable ways to meet, present and connect.

Certified by Microsoft Teams

Whether on the go, at home or in the office, accessories that are certified by Microsoft Teams help your team work anywhere with confidence.

- Microsoft's largest global reseller
- Devices sourced to 49 countries in 14 currencies

Insight + Microsoft Teams

Manage today.
Transform the future.
Together.

Next-level meetings, anywhere

Move beyond presenting.

Microsoft Presenter+

Microsoft® Presenter+ takes presentations to the next level by letting you present, participate and engage in meetings, in person or online, with the push of a button. It lets you advance slides, focus attention on key content and quickly mute/unmute.

Give voice to your productivity.

Surface® Headphones 2+

You'll empower your team with work headphones that keep them connected and productive during immersive, high-quality Microsoft Teams® calls and distraction-free focus.

Say hello to a better call experience.

Microsoft Modern USB Headset

You'll unlock high-quality audio and voice, noise-reducing microphones and intuitive call controls. And, you can choose between a USB-C® or USB-A connection.

Bring success into focus.

Microsoft Modern Webcam

This easy-to-mount system adds high-quality video to your workspace, and it features HDR and True Look for facial retouch and automatic light adjustment.

Add power to connectivity.

Microsoft Audio Dock

Can one device redefine what it means to connect? We think so. Microsoft Audio Dock connects external monitors, powers laptops and fills rooms with multidimensional sound for music and meetings — all with a single plug.

Productivity is on the line.

Microsoft Modern Wireless Headset

This wireless headset makes calls and work more comfortable and reliable with great audio quality, thanks to a noise-reducing mic that cuts down on background noise.

Turn productivity all the way up.

Microsoft Modern USB-C Speaker

You'll improve your Teams meetings with clear, reliable audio from an omnidirectional, background noise-reducing mic. And, it includes cable storage and a carrying case.
