Security Roadmap Workshop

Build a strategy to next-generation security

Business challenge

As companies embrace the opportunities presented by cloud and mobile computing, they take on new risks. One of the biggest challenges in digital transformation is ensuring security. Complex security environments leave many organizations unable to identify, assess and mitigate security risks in the overall threat landscape. Furthermore, confusing security tools, offerings and features can make it difficult for organizations to identify measures and best practices that fully address their security concerns.

According to the 2019 Insight Intelligent Technology™ Index:

43%
of IT decision-makers report that **ensuring the security of data in dispersed environments** is a top challenge.[1]

The combination of **security and data privacy** is the top digital innovation challenge for **48% of IT professionals.**[1]

45%
of IT professionals plan to switch to cloud architectures **in the next 12 months**, with improved identity and access management being a key motivator.[1]

Microsoft 365™ protects your business data, proactively guards against threats, and equips you to better manage identity and access controls; however, understanding how these features impact your organization, and keeping up with the pace of changes and updates, can be challenging.

Our solution

The road to understanding Microsoft® cloud security and how it can address the specific needs of your organization begins with choosing the right partner. Our Security Roadmap Workshop will help you sort through the features and functionality of Microsoft cloud security tool sets to develop a security posture that's appropriate for your organization.

This workshop gives you a security roadmap that focuses on:

- Discovering identity-based security threats in your environment
- Understanding Microsoft 365 security capabilities for identity, data and devices
- Assessing your organization's security posture
- Determining actionable next steps to advance your security journey

Benefits

- Get a realistic view of your security stance.
- Learn best practices for risk mitigation.
- Try out Microsoft® solutions with expert guidance.
- Receive recommendations for security enhancements.

A tactical approach

Microsoft® Secure Score is a powerful tool for evaluating and improving your security posture. Our workshop will show you how to take advantage of its benefits.

Protect against security threats.	Protect business data against leaks.	Control who has access to business information.	Reduce risk with effective and modern tools.

There are resounding reasons for making security a top priority — and considering Microsoft solutions in your go-forward strategy.

The share of inbound emails that were phishing messages increased 250% between January and December 2018. Microsoft has continued to harden against these attacks with features to help secure users.[2]
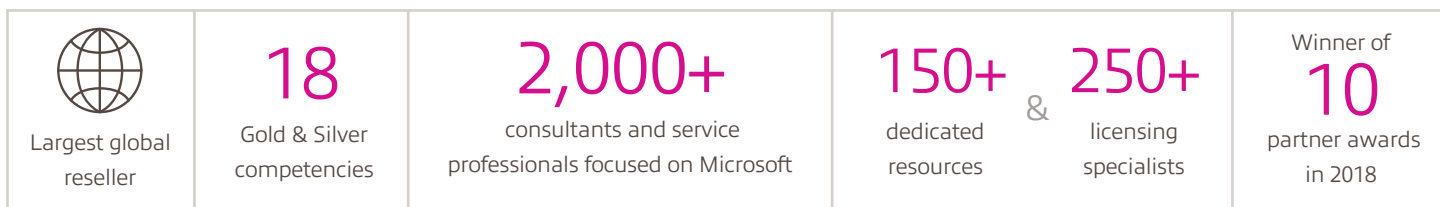

Software supply chain attacks are prevalent and unflinching — **in the first 12 hours of the Dofoil trojan campaign in March 2018, Windows® Defender Antivirus blocked 400,000 infection attempts worldwide.**[2]

Malware encounter rates decreased by several points between 2017 and 2018. Some potential reasons for the overall decrease are the growth in adoption of Windows 10 and increased use of Windows Defender.[2]
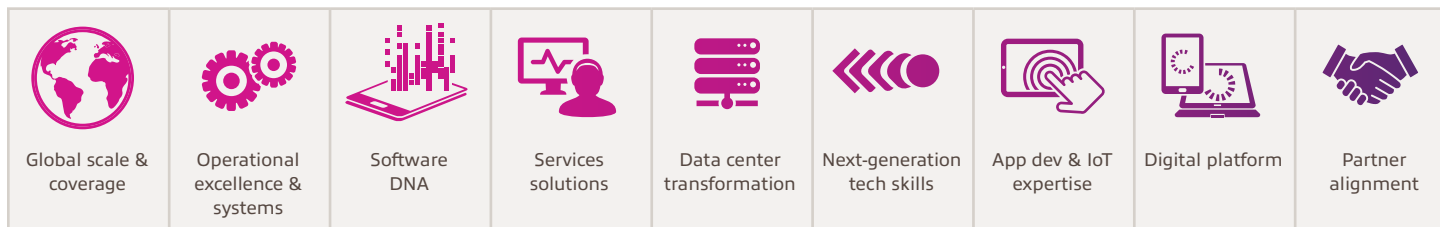

Why Insight for Microsoft

Insight has been a prominent Microsoft partner for more than 25 years. We demonstrate our enduring commitment through unique service offerings, numerous certifications and awards, and impressive infrastructure to support service delivery and, ultimately, our clients.

Largest global reseller	**18** Gold & Silver competencies	**2,000+** consultants and service professionals focused on Microsoft	**150+** dedicated resources & **250+** licensing specialists	Winner of **10** partner awards in 2018

A true end-to-end partner

Today, technology isn't just supporting the business; it's becoming the business. At Insight, we help you navigate complex challenges to develop fresh solutions and processes. We'll help you manage today's priorities and prepare for tomorrow's needs.

Global scale & coverage	Operational excellence & systems	Software DNA	Services solutions	Data center transformation	Next-generation tech skills	App dev & IoT expertise	Digital platform	Partner alignment

About Insight

At Insight, we define, architect, implement and manage Insight Intelligent Technology Solutions™ that help your organization run smarter. We'll work with you to maximize your technology investments, empower your workforce to work smarter, optimize your business and create meaningful experiences.
