We understand the hurdles with mixed laptop real estates in agile working environments. The DOCK180USZ includes a detachable **USB Type-A to USB Type-C** dongle to make the dock universally compatible with non-USB-C laptops.

Targus docking stations are truly universal, and support all of the top brands — HP®, Dell™, Lenovo™, Apple® and more. OEMs will not guarantee their “universal” docking stations work with other brands.

TOP SELLING LAPTOPS

BRAND	MODEL
HP	HP 250 G5 i5-6200U 15.6"
HP	HP 250 G5 i3-5005U 15.6"
HP	HP 430 G4 i5-7200U
HP	HP ProBook 450 G4
DELL	Dell Latitude™ 5480
DELL	Dell Latitude E7440
HP	HP 250 G5
APPLE	MacBook Air® 13-inch
HP	HP Elite x2 1012

LET'S TALK FACTS!

- USB-C is relatively new and it will take time to transition legacy equipment. Targus is the only provider of backwards- and forwards-compatible universal docking stations and accessories.
- For every Targus universal docking station, we offer a complementary suite of software utilities that enhance productivity, user experience, and docking station operation.
- USB-C can support multiple Power Delivery (PD) Profiles, but it can fry your tech and even compromise employee safety if not used correctly. Targus have trusted technical experts in power and connectivity.
- Not all USB-C laptops can support native dual video output. DOCK180USZ overcomes this.
- Targus provides an industry leading 3-year limited warranty.

DOCK180USZ

is compatible with all brands
and all of these models.
